PROFILE

Full-Stack **Software Engineer** with **3 years** of experience building scalable, high-impact applications at BizReflex. Skilled in **TypeScript, JavaScript, PHP, MySQL**, and **PostgreSQL**, with strong expertise in full development lifecycle and system architecture. Successfully delivered complex platforms, including a Technician-Customer Coordination System (**TekumoPro**) and Garments **Production Tracking solutions**. Seeking an opportunity to contribute to innovative, growth-driven teams.

SKILLS

Programming Language: **TypeScript, JavaScript, PHP**, python, c

Framework: **NodeJs**, ExpressJs, **NestJs**, **Angular**, React, **Laravel**, JQuery

Database: **PostgreSQL, MySQL**

Operating System: Windows, **Linux**

Web Design: HTML5, CSS3, Bootstrap, Tailwind

Version Control: **Git**, Github, GitLab, **Azure**

Others: **Redis, RabbitMQ**, Data Structure, Algorithm, Web Socket, **Docker**, **OOP**, Networking

Professional Experience

06/2023 – Present

Software Engineer

Baridhara, DOHS

Business Reflection Informatics(Bizreflex) 🔗

Business Reflection Informatics System (Dubai, UAE) is a technology company providing scalable Managed Service Platforms and innovative digital solutions to empower field service operations.

01/2022 – 05/2023

Web Developer

Uttora, Dhaka

Barcodetech Automation 🔗

A leading technology company specializing in advanced Garments Production Management Systems, delivering end-to-end automation, real-time production monitoring, and data-driven efficiency solutions for the apparel manufacturing industry.

Projects

06/2023 – Present

TekumoPro

 🔗

Real-time, Uber-style field service management in one platform.

TekumoPRO is an Uber-like field service platform that connects customers and technicians with real-time automation, streamlined workflows, and reduced service costs.

Tech Stack: NestJS, Angular, RxJS, PostgreSQL, Redis, RabbitMQ, Docker, etc.

01/2022 – 05/2023

Fabric Batch Tracking System

End-to-End Fabric Production Tracking System for the Garments Industry

A comprehensive system to track fabric production from yarn receipt to shipment. Each step — fabric production, barcoding, dyeing, cutting, sewing, ironing, packing, and shipping — is monitored via barcode scanning to ensure full traceability and operational efficiency.

Tech Stack: Laravel, MySQL, jQuery, jq-Grid, Redis, etc.

01/2022 – 05/2023

Store Management System

Automated Fabric Store Management System for Palmal Group

A fabric store management application for Palmal Group that tracks inventory by rack location, automates order fulfillment via barcode scanning, and provides accurate, real-time reporting for efficient operations.

Education

01/2017 – 12/2020

BSc in CSE

Chuadanga

First Capital University Of Bangladesh, Chuadanga [↗](#)

11/2011 – 01/2016

Diploma in Engineering - Computer Technology

Jhenaidah

Jhenaidah Polytechnic Institute [↗](#)

Languages

Bangla

Native/Bilingual

English

Conversational
