

SAHADAT HOSSEN *Full Stack Software Engineer*

sahadatjh@gmail.com | 01756603812 | Badda, Dhaka | LinkedIn | Portfolio | Github

PROFILE

Full Stack Software Engineer with **4+ years** of experience building scalable applications using **TypeScript, Node.js, NestJS, React, Next.js, PostgreSQL, MySQL, Redis**, and AWS. Experienced in designing RESTful APIs, real-time applications, distributed systems, and AI-assisted software development using **Gemini, Claude** and GitHub **Copilot** to accelerate development while maintaining code quality.

SKILLS

Languages: **TypeScript**, JavaScript, **PHP**, SQL

Frontend: **React.js, Angular, Next.js**, RxJS

Backend: **Node.js, NestJS, Express.js, Laravel**

Database: **PostgreSQL**, MySQL, MongoDB, Redis

Cloud & DevOps, AWS, EC2, **Docker, Nginx, Linux**, GitHub Actions, **CI/CD**

Architecture: REST APIs, Microservices, **RabbitMQ, Caching**, Authentication, Authorization

AI Development: **Claude**, GitHub Copilot, OpenAI, Codex, **Gemini**

Tools: Git, GitHub, Swagger, Postman

PROFESSIONAL EXPERIENCE(4+ YEARS)

Software Engineer, *BizReflex* 

06/2023 – Present | Baridhara DOHS

- Architected and developed scalable backend services using **NestJS, Node.js, PostgreSQL, Redis, and RabbitMQ** for a field service management platform, ensuring high performance, maintainability, and reliability.
- Designed and implemented secure **RESTful APIs** with authentication, authorization, RBAC, request validation, caching, and optimized database queries to improve application performance and scalability.
- Built **event-driven workflows** using RabbitMQ and developed real-time business features, enabling automated job assignment, technician tracking, notifications, and seamless operational processes.
- Collaborated with cross-functional teams on system design, feature planning, code reviews, and production deployments using **Docker**, delivering high-quality software while following clean architecture and software engineering best practices.

Web Developer, *BarcodeTech Automation* 

11/2021 – 05/2023 | Uttora, Dhaka

- Developed and maintained a production-grade **Garments Production Tracking System** using **Laravel, React, Next.js, MySQL, and Redis**, digitizing end-to-end manufacturing workflows and improving operational efficiency.
- Designed and implemented scalable backend modules and responsive frontend interfaces for inventory management, production tracking, barcode-based workflow automation, and shipment processing.
- Optimized **MySQL** database design, complex queries, and application workflows, improving system performance, data integrity, and overall user experience.
- Collaborated with cross-functional teams to deliver new features, troubleshoot production issues, and maintain clean, maintainable code while supporting business-critical manufacturing operations.

PROJECTS

Tekumopro, *Real-Time Field Service Management Platform*

06/2023 – Present

- Developed a scalable field service management platform using **NestJS, Angular, PostgreSQL, Redis, and RabbitMQ**.
- Built secure **RESTful APIs**, real-time features, and automated workflows using an **event-driven architecture**.
- Optimized database queries and caching for improved performance and deployed services using **Docker**.

Fabric Batch Tracking System, *End-to-End Garments Production Tracking*

09/2020 – 11/2021

- Developed an end-to-end fabric production tracking system using **Laravel, MySQL, jQuery, jqGrid, and Redis**.
- Implemented barcode-based tracking across the production lifecycle, from yarn receipt to shipment, ensuring complete traceability.
- Built inventory management, batch monitoring, and reporting modules to improve production efficiency and reduce manual processes.

EDUCATION

BSc in CSE, *First Capital University of Bangladesh* 

01/2017 – 12/2020 | Chuadanga

Diploma In Computer, *Jhenaidah Polytech Institute* 

09/2011 – 12/2015 | Jhenaidah
